Organisations across the world are facing an unprecedented shift

CorpStage ESG Intelligence Agents transform how organisations manage sustainability, risk, and AI governance. Built on Responsible AI design principles, these agents deliver continuous intelligence, automate complex tasks, and generate decision-grade insights at enterprise scale.

The CorpStage ESG Intelligence Agent Suite

Eight advanced agents engineered to automate disclosures, validate data, monitor supply chains, assess risks, and guide sustainable digital transformation.

01

ESG Gap Analysis Agent

Automates disclosure evaluation across ISSB, GRI, CSRD, SEC Climate Rule, and more. Identifies missing elements, recommends actions, and produces board-ready insights.

03

Supplier ESG & Human Rights Risk Agent

Evaluates supplier questionnaires, certifications, controversies, and labour/human-rights risks. Strengthens supply chain transparency and due diligence.

05

Sustainability KPI & Data Quality Agent

Extracts and validates KPIs across energy, emissions, waste, water, and social data. Detects anomalies, ensures data lineage, and maintains assurance-ready quality.

07

Risk, Opportunity & Materiality Intelligence Agent

Delivers double materiality analysis aligned with ISSB/CSRD, identifies financially material risks and opportunities, and produces customised materiality matrices.

02

Regulatory Intelligence Agent

Continuously scans APAC, GCC, EU, and global markets for policy changes, translating regulatory shifts into clear business implications.

04

Climate Scenario & Transition Risk Agent

Runs NGFS/IPCC-aligned climate pathways, carbon-price forecasts, and transition/physical risk scoring for future-ready decision making.

06

Greenwashing Detection & Integrity Agent

Compares narratives against performance data to flag misleading claims and ensure consistency across commitments, targets, and disclosures.

08

Responsible AI Agent

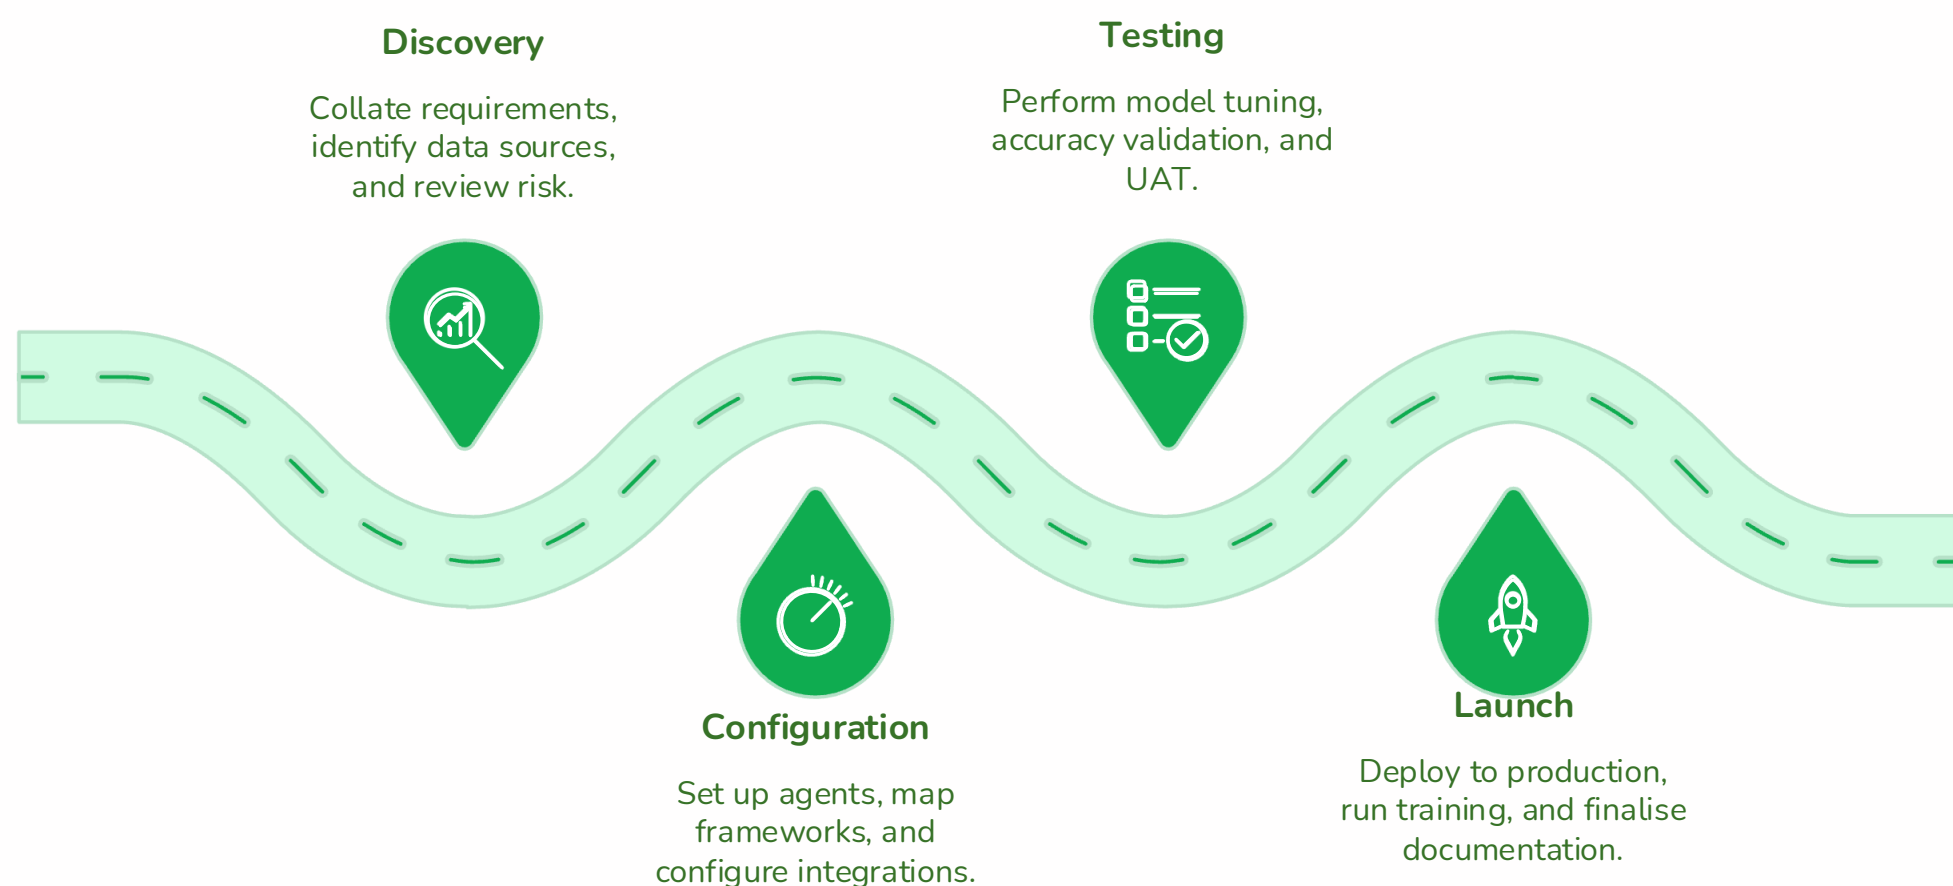

Assesses AI governance maturity, maps compliance to EU AI Act/NIST/ISO 42001, generates model documentation, and tracks SAIQ (carbon-efficient AI operations).

Secure, Enterprise-Grade Architecture

Designed for banks, listed companies, public institutions, and organisations with strict data governance.

Implementation -6-8 Weeks

Pricing Options

Standard Agent Implementation — \$19,500-single-agent

Enterprise Agent Implementation — \$29,500- For complex or multi-entity

Full Multi-Agent Suite — Starting at \$75,000+-end-to-end ESG intelligence
